

Team Spirit

THE CLIENT

The client came to us with the desire to create a large entertainment area within their walkout basement. The client lives on a lake where they host many parties; therefore, they desired a fun entertainment area for their friends and family.

THE SITUATION

Their current bar and seating area couldn't even be labeled as adequate. They needed lots of seating and it simply didn't exist at the original bar. There were no visuals of the lake from the existing bar and no ability to view the TV from that bar. Therefore, no one ever sat there. The family loves football and enjoys watching professional and college teams compete. The vision was to create a unique, high quality bar that would make them believe they were sitting in a sports pub, while at the same time giving them great views of the lake.

THE SOLUTION

To achieve their dream basement, we designed a U-shaped bar that would accommodate 12 bar stools, allowing guests to have visuals of the lake and TV. We wrapped the outer portion of the bar in real astro turf and painted lines and numbers on it to create the look of a football field. We made the bar fully functional by incorporating a dishwasher, wine & beer refrigerator, ice maker, disposal, sink, faucet, and good lighting. We created an area of upper cabinets with glass doors and a locking system to store liquor that would be inaccessible to their children. What a great entertainment area for this fun loving family!

For this client and many others, Kircher Design and Build offers an award winning team to complete the project of your dreams.
